

the all-in-one solution

MEDENT is the smart, user-friendly software that redefines:

EMR/EHR • Practice Management • Patient Portal • Telehealth

for providers
robust functionality made simple

EMR/EHR

MEDENT EMR/EHR was developed from the ground up with a focus on efficiency and reliability. Our emphasis on Disease Management and Health Maintenance formulas enables you to data mine for specific information or prompt users at the point of care.

Interoperability

As a member of Carequality, MEDENT can connect you to thousands of physicians across the country, and direct messaging is built into the heart of MEDENT to enable true interoperability between systems.

MEDENT Mobile

MEDENT Mobile enables you to stay in contact and access your patients' medical records from anywhere.

Medical Content

Access more than 30 different medical specialties, and document visits via touch, point & click, Dragon Medical speech recognition, or voice notes.

for the practice
the GOLD standard in getting paid

Practice Management

Information from the patient chart flows seamlessly into the eSuperbill, charge entry and posting areas of the system. MEDENT includes a wide array of interactive reports and interfaces, including Revenue Performance Advisor, which can help practices optimize revenue cycles.

MACRA

Easily update information related to the Medicare Access and CHIP Reauthorization Act (MACRA).

MIPS

MEDENT accommodates two reimbursement programs—MIPS and Advanced APMs. Built-in dashboards and comparison graphs enable you to monitor MIPS and/or Medicaid PI compliance.

CCM & HCC

MEDENT simplifies Chronic Care Management (CCM) and Hierarchical Condition Categories (HCC), which can help generate additional revenue.

Customer Support

When patient care is on the line, it's important to have MEDENT'S #1 support team on your side.

Lab Clearinghouse

Because MEDENT's bidirectional lab interfaces with over 260 hospitals, lab companies and LIS systems, structured data drives DM/HM formulas, flowsheets and graphs.

for patients
convenient communication

Patient Portal

MEDENT's Patient Portal will modernize the way your office communicates with patients. You'll streamline the workflow in your office with advanced features, such as the Patient History, eStatements with online pay, and eVisits.

Self Check-in Kiosk

MEDENT's Self Check-in Kiosk can cut patient wait times while helping practices boost collections, compliance and efficiency.

Telehealth Video Visits

MEDENT's video visit feature enables convenient, HIPAA compliant video communication with your patients, without the need to download apps or install plugins.

Prescriptions, ePA & EPCS

MEDENT's advanced drug and eprescribing capabilities can alert users about patient-specific issues at the time of prescribing, and with MEDENT and CoverMyMeds, patients can receive a cash-pay discount card for eligible medications.

Online Scheduling & Pre-Check-in

With MEDENT, patients can book an appointment directly from a practice's website and complete the check-in process at home. This can reduce the burden on staff and saves time at the office.

Patient Feedback

With MEDENT and Well iQ, patients can provide real-time feedback on their experience, surveying every staff, departmental and facility touchpoint. This allows practices to monitor and improve performance as well as public five-star ratings.
